

Investment Objective

The Fund aims to achieve long term capital growth by investing at least 80% of the Fund in equities of growing UK smaller companies. The Fund seeks to outperform the Numis Smaller Companies Index plus AIM ex Investment Companies over rolling 5-year periods (after charges). Stocks are selected on the basis that they fit our investment criteria.

Investment Policy

Our investment philosophy holds that over the long term the compounding of earnings growth drives the most attractive returns. The investment process focuses on proprietary research to identify companies that can consistently grow cash flows and earnings above the market average, with a high degree of predictability. The manager aims to invest in companies whose growth prospects are underestimated by the market over rolling three-to-five-year periods, hence offering upside to share prices if growth exceeds market expectations. The focus on a diversified customer base and recurring earnings leads the managers to exclude certain 'unpredictable' sectors entirely – these include commodities, banks, and binary life sciences.

Investment Manager

Whitman Asset Management Limited is an independent investment firm based in London. The fund management team focus solely on listed smaller company investing. Our goal is to produce compelling compound returns for our investors over the long-term.

Key Facts

Launch date	9 December 2020

Cumulative Performance - Since Inception

Performance Table

	YTD	1 Month	3 Month	6 Month	2022	2021	Inception*
WS Whitman UK Small Cap Growth Fund	-7.0%	-1.9%	-3.1%	-2.0%	-26.6%	31.8%	-5.6%
IA UK Smaller Companies Sector ²	-5.9%	-1.2%	-1.9%	-3.1%	-25.2%	22.9%	-9.3%
Numis Smaller Companies + AIM (excl Investment Companies) Total Return Index ³	-3.4%	-1.6%	-1.3%	-2.9%	-21.9%	20.0%	-4.9%

Past performance is not a reliable indicator of future results. The value of your investment and the income derived from it can go down as well as up and you may not get back the money you invested.

¹Inception date (9 December 2020), YTD, 6 month, 3 month and 1 month data is calculated to month end, at 30 September 2023.

²The IA UK Smaller Companies Sector gives investors an indication of how the Fund is performing compared with others investing in a similar investment universe.

³The stocks comprising the Numis Smaller Companies + AIM (excluding Investment Companies) Total Return index are aligned with the Fund's objectives and on that basis, the index is considered an appropriate performance comparator for the fund. Please note the Fund is not constrained by or managed to the index.

FOR PROFESSIONAL INVESTORS ONLY

Retail Investors should consult their financial adviser.

RISK WARNINGS

The value of your investment is not guaranteed and may go down as well as up and you may not get back the amount invested. This is because the share price is determined by the changing conditions in the markets in which the Fund invests. You should regard your investments as long-term. A dilution levy may be applied to the share price whenever the Fund is expanding or contracting. Should you buy when the Fund is expanding and sell when the Fund is contracting, this will have an adverse impact on the return from your investments. Full details of the WS Whitman UK Small Cap Growth Fund, including costs and risk warnings, are published in the Prospectus of the WS Whitman OEIC. This factsheet does not provide you with all the facts that you need to make an informed decision about investing in the Fund. You need to read the associated Key Investor Information Document (KIID) and the Supplementary Information Document (SID) and decide whether to contact an authorised intermediary. If you do not already have a copy, please contact **Waystone on 0115 988 8262** (<https://www.tbaileyfs.co.uk/funds/tb-whitman-oeic>). The SID details your cancellation rights (if any) and the KIID shows you how charges and expenses might affect your investment. Tax rates, as well as the treatment of OEICs, could change at any time. Smaller Companies - Investment in smaller companies can be higher risk than investment in well established blue chip companies. Funds investing significantly in smaller companies can be subject to more volatility due to the limited marketability of the underlying asset.
